## OBJECTIVE

As a IT engineer, my vision as well as my professional orientation is software industry which consists both application from client side and web service. I have some experience of Android & Java developing and would like to become great Android engineer. With my current knowledge, I am finding an environment which gives me favorable condition to enhance my analyzing & designing skills, making solution and management skills. I admire a good leader who can enhance member's knowledge and help them promote their strong points. At the same time, i also need a friendly condition to share my experience to each others. With my efforts of learning & supporting others, I believe i can help our company to have a new good engineer, good co-worker and i would like to work in here for a long time.
