Email address: nkhuy1609@gmail.com

Position: Intern/Fresher/Junior Web Developer

Personal statement

I have been studying programming websites for 1 year. I mainly focus on PHP & MySQL but I also have a good knowledge and experience with front-end languages (technologies) such as HTML, CSS, Javascript, JQuery and Bootstrap.

My career objective is to become a professional programmer. I want to learn and understand computers more so that I can create great applications and bring valuable things to the company.

Skills

- ✓ Knowledge of HTML, CSS, Javascript, JSON, XML
- ✓ Front-end frameworks: JQuery, Bootstrap
- ✓ Knowledge of Object Oriented PHP
- ✓ Understanding MVC architecture
- ✓ Good knowledge of MySQL, able to design database for simple websites.
- ✓ Knowledge of advanced techniques such as triggers and stored procedure in MySQL
- ✓ Working with Codeigniter framework comfortably.
- ✓ Basic knowledge of other PHP Frameworks such as Laravel, Yii, Kohana, CakePHP.
- ✓ Building websites with Wordpress, creating simple themes, able to use popular plugins such as WooCommerce, Visual Composer, Slider plugins...
- ✓ Able to integrate popular APIs such as: Google maps, wysiwyg editors...
- ✓ Understanding GIT, managing projects using Github.
- ✓ Basic knowledge of computer networking
- ✓ Good English, able to communicate and understand technical documentation.
- ✓ Passionate, hard-working, honest, willing to learn new things and easy to get along with.

Projects

1. Basic website for selling phones.

Source code: <https://github.com/huynguyen93/banhang>
