NGUYEN TRONG LAN

392/8/124A Cao Thang ● Ward 12, District 10, HCM city ● Phone: 0121 996 9042

● Email: kira.nguyen180692@gmail.com ● Birthday: 18/06/1992

Experience

Android – 1 year
Objective-C – 2 month
JavaScript – 2 month

Key Skills

Android Basic

Android Advance

JNI Android

Android Architecture

Social Network

Break and Knowledge Modules

Control quality (UT-FT)

Web service

Database (SQLite, Couch DB)

Reading and speaking English

Education

Ho Chi Minh University of Foreign Languages and Information Technology

Engineer in Information Technology, 2014

INFORMATION TECHNOLOGY SPECIALIST

Android Developer

InfoSec specialist Have experience in develop Android Application. Already done 5 projects, have detailed knowledge of android tools, technologies and best practices. Having quick solution and creativity in work. Friendly and work well in team

Technology Summary

Technologies:	Android, JavaScript, Objective-C
Systems:	Windows (all), Mac OS
Networking:	LANs, WANs, VPNs, Routers, Firewalls, TCP/IP
Software:	MS Office (Word, Excel, Outlook, PowerPoint)

IT Experience

TMA SOLUTION Co, HCM City	**Engineer,** Nov 2014-Present
ANTKING Co, HCM City	**Interview,** Aug 2014- Nov 2014

Recent Project Highlights:

- **Sharp UC:** About app reading book for student in University. Do with 4 environment: Android, iOS, Mac and Window, with Core-C is main action, with 1 year long. In this project, I know about JNI Android to connect Core-C and Android, process and thread.
- **FCCS:** About reading business newspaper in Singapore. In this project, I know about call POST and GET method to get data, and parse data to object, and control smooth with large data.
- **Frame Monkey:** This project about convert video to gif file and share to social network. With this project, I know about used OAuth 2.0 and SDK Social for connect, and also know about connect hardware in Android, convert image and video to another type. Social network: Facebook, Google+, Twitter, Tumblr, Instagram.
- **NGC:** About call and send mess, set schedule for meeting. In this project, I learn about quality control and security. With no mistake, this project teach me how to design module with security and quality. Also have web service with POST and GET method
- **Nexmac:** This project about sell food in some restaurant or fast-food store. In this project, I know used Couch DB(NoSQL) and know more about quality, because this project need correct number when cash out, so if something wrong, it maybe can get huge issue from customer
