- Following Agile methodology

From 5/2012 – 12/2012 : FPT Information System
Position: Internship ABAP Developerr

- Working in Oracle system on real database of company.

RECENT PROJECTS

Project	AMIONE (website app)
Duration	9/2013 - Current
Size (Days)	2 Years
Position	Senior manual/automation Tester
Project Description	AMI.ONE is a remedy to collect electronic meter data based on telecommunications infrastructure which was researched and developed by Viettel. Using electronic meters that equipped for customers and stations by Power Sector, Viettel installs 3G/GPRS modem attached to electronic meters in order to read the meter data and transmits it to a central server for maent and exploitation. This service have been deployed recently in Khanh Hoa and Ho Chi Minh City

My Responsibility	Suggest the testing plan for Leader.
	In my last project, the application was a web-based application developed in Java platform. As a QC Person, I wrote Test Plans from the requirement documents and Use Cases. I performed Smoke Testing, Functional Testing, Backend Testing, BlackBox Testing, Integration Testing, Regression Testing and UAT (User Acceptance Testing). I have participated in Load Testing. I attended several walkthrough meetings for requirement reviews and provided feedback to the Business Analysts. Mostly, I was in the backend testing, which required writing SQL queries directly to the database.
Technology	Environment: Windown, API Development Language: Java.

HOBBIES

- Reading IT and business books.
- Traveling
- Research new technology
- Football
